

i-molar I

60 capsules = 48 g

Dietary foodstuff for specific medical purposes to strengthen the body's immune system within a dietary plan.

i-molar II

60 capsules = 52,8 g

Dietary foodstuff for specific medical purposes by symptoms of exhaustion and continual stress within a dietary plan.

i-molar III

60 capsules = 38 g

Dietary foodstuff for specific medical purposes to supplement the treatment of arteriosclerosis, heart diseases, neurodermatitis, rheumatism, psoriasis.

Many Good Reasons for i-molar:

- contains up to 1785% of the normal daily dose of vitamins or micro nutrients *
- free of food additives, artificial sweeteners and preservatives
- consisting of valuable vitamins,
- minerals and
- trace elements in connection with secondary organic substances,
- or valuable omega III /VI fatty acids
- effective absorption of the vitamins / minerals due to the harmonious compositions
- fair price

* based on vitamin B1 – translates to 2 capsules per day

Important:

Referring to substances, which may cause side-effects from overdosis, the daily dosages are calculated so as not to exceed the 100% normal daily allowance such as selenium, iodine, vitamin D3, or beta carotene.

We recommend for the optimal tolerance of a dosage, that it be taken at or after a meal with plenty of neutral fluids such as water or tea.

If hyperthyroidism (overactive thyroid gland) is present, it should be checked by a physician before taking **i-molar I** or **i-molar II** since every capsule contains 50 micrograms of iodine. **i-molar I** contains vitamin K1 (important for growth and coagulation) and must therefore be taken into consideration when taking anticoagulants (ex. coumarin) since the vitamin K increases the Quick respectively or the INR decreases, as the case may be.

i-molar I

to strengthen the body's natural defences

i-molar II

for symptoms of exhaustion and continual stress

i-molar III

to naturally supplement the body's omega III fatty acids

health with nature

i-molar I

The immune system is the basis for our health – fortify it noticeably through the strength of nature.

Are you frequently suffering from infections diseases, have you had an antibiotic therapy, radiation therapy, or does your body no longer respond to organic medicines used to stimulate the immune system?

Do you have an adversity to or have an irritability towards food additives, artificial sweeteners and preservatives?

In these cases we recommend adults and adolescents to take a daily dose of 1 - 2 **i-molar I** capsules until the desired level of effect has been achieved. The dose can then be reduced according to the needs of the individual.

Important here is to drink plenty of fluids so that the active ingredients can be dissolved. Vitamin C will not be perceived as sour and the secondary organic substances can unfold a better detoxification effect. For optimal benefits, drink a minimum of 400 ml of fluids after taking a capsule.

“We point out that the offered products are not medicines and therapeutical success for the elimination of concrete symptoms is not promised.”

i-molar II

Bring yourself and your body in unison. Give it the necessary antioxidants in the form of vitamins, minerals and trace elements.

Do you suffer from stress, tension and chronic fatigue or exhaustion? Do you have an adversity to or have an irritability towards food additives, artificial sweeteners and preservatives?

In these cases we recommend adults and adolescents to take a daily dose of 1 - 2 **i-molar II** capsules with breakfast or lunch. It is important to drink plenty of fluids (at least 300 ml) after taking each dose. Experience has shown commonly after only one month the body's depots of these mentioned substances have been replenished. The individual dosage will be reduced with continued use.

i-molar III

The skin is our largest organ – give it the attention it needs, as well as, strengthening your cardio vascular system.

Are you affected by neurodermatitis, psoriasis, arterio-sclerosis or rheumatism – or do you have very dry, sensitive skin? Would you like to do something to benefit your cardiovascular system?

In these cases we recommend as the supplier of organic omega III and VI fatty acids, a dose of 1 - 2 **i-molar III** capsules per day. Since the capsules contain only oils, they are best taken with a piece of bread or with a meal and something to drink (ex. tea).

The Benefits of our i-molar Compounds

i-molar I and **i-molar II** are compounds of so-called “supplementary balanced diets” and consist of vitamins, minerals and trace elements in connection with secondary organic substances. They have a high bioavailability. So for example, iron is supplemented through copper, zinc through chromium, and calcium through vitamin D3. Only in these combinations can the vitamins and minerals be absorbed or utilized by the body. **i-molar I** and **i-molar II** do not contain any artificial sweeteners, food additives or preservatives – and all of this at a fair price. **i-molar III** is a dietary supplement with a high concentration of essential fatty acids from the herbal sector (250 mg each of borage seed and Evening Primrose oils). This is an alternative to the usual omega III and omega VI fatty acid compounds, which are merely extracted from salmon and other fish oils.
